

## Orion Governance announces new features

SAN FRANCISCO, March 23, 2020 - - Orion Governance, a disruptor in the Information Governance space and the provider of the Enterprise Information Intelligence Graph (EIIG), the foundation for the data fabric, has announced several new features to the platform.

### The new features include:

- Perspective View
  - Information flow at any level in the organization. Automatically switch between Line of business, organization, application, system or full detail view with agility. **No ETL or modeling needed.**
- Operational Metadata
  - Load access, sensitivity, volumetric, execution metadata and get full insight into your data landscape.
- Data Quality
  - Upload data quality metrics from Informatica, IBM or Talend and watch it propagate all the way to the reports. **Trust through transparency.**
- Metadata Analytics
  - Identify table duplication, track data quality over time, visualize business concepts (CCPA, GDPR) distributed over assets, identify orphaned object. **Reduce your exposure and operating costs.**

### About Orion Governance

Orion Governance, headquartered in San Francisco, CA with offices in the United States, Estonia, Sweden and India, is a global leader in information governance, working with Global 5000 companies in various segments, such as banking, insurance, retail, healthcare, and technology.
